

Investment objective & strategy

To achieve long-term capital growth through equity or equity related investments predominantly in the stock markets of India. The Fund will also invest in companies traded in other markets where a significant proportion of growth in their underlying business is set to derive from India.

The Fund offers access to the equity market of one of the largest and the fastest-growing economies in the world. Our investment approach results in a concentrated and high conviction portfolio of stocks benefitting from the India growth opportunity. We are long term investors and focus on quality at a management, promoter and franchise level in companies offering valuations with a favourable risk-reward balance that exhibit superior compounding potential over time.

Commentary

Following strong outperformance in March, the mainline Indian equity indices (Nifty, Sensex) underperformed both developed and emerging markets in April despite registering positive returns of around 1% (INR terms). Large cap stocks performed better than small and mid-cap stocks as FII purchases continued to be focused on larger companies, while domestic investors were again net sellers in the month. The Indian Rupee slightly weakened over the period (down 0.59% versus USD), inline with USD strengthening against most emerging market currencies.

Over half of India's electorate have cast their votes in the country's multi-phased general election. Of the phases completed so far, it has been reported that voter turnout is showing a broad improvement over 2014, where the recorded turnout of 66.4% was the highest ever according to the Election Commission of India. Recent voting in Gujarat saw a turnout of 64.11% breaking its 52-year record as compared to 63.66% in 2014 where PM Modi achieved a clean sweep of seats.

The fourth quarter fiscal year 2019 (4QFY19) earnings season is well underway. Results so far are largely in line with expectations but there have been some significant surprises. Some of the lower quality financial stocks were hit late in the month following much worse than expected results from Yes Bank. India's largest auto company Maruti Suzuki reported subdued numbers as well as confirming slower consumption across the auto industry. On the other hand, other key stocks such as TCS and Axis Bank reported good earnings leaving the market overall largely unfazed so far.

¹IIFL Fund was launched on 29 January 2019 by way of a merger with Ashburton Investments SICAV - India Equity Opportunities Fund. All performance figures prior to this date pertain to Ashburton India Equity Opportunities Fund. All returns below 1 year are absolute and above 1 year are annualized. The returns are shown for USD and GBP series in their respective currencies. Income is reinvested on the ex-dividend date. The above performance is calculated for the portfolio and actual individual investor performance will differ as a result of applicable initial fees, actual investment date, date of reinvestment and dividend withholding tax. Past performance should not be seen as an indication of future performance. Where investments involve exposure to a currency other than that in which it is denominated, any currency movement may also have an adverse effect on the capital value of your investment. Investors should carefully consider the risk factors in the Offering Documents before making any investment. Past performance is not necessarily an indication of future performance.

²Inception Date refer to the inception dates of the respective share class of the Ashburton India Equity Opportunities Fund. ³AMC Fees refers to Investment Management Fees. ⁴Total Expense Ratio (TER) is estimated and expressed as an annualized percentage of the charges, levies and fees incurred by the portfolio related to its management, for the period under review against the average NAV of the portfolio over this period. A higher TER does not necessarily imply a poor return, nor does a lower TER imply a good return. The current TER cannot be regarded as an indication of future TERs. ⁵Minimum investment amount is shown in USD and can be an equivalent amount in other respective currencies. ⁶Since inception returns for Benchmarks are from the inception date of Class I USD and GBP respectively
