

Investment objective & strategy

To achieve long-term capital growth through equity or equity related investments predominantly in the stock markets of India. The Fund will also invest in companies traded in other markets where a significant proportion of growth in their underlying business is set to derive from India.

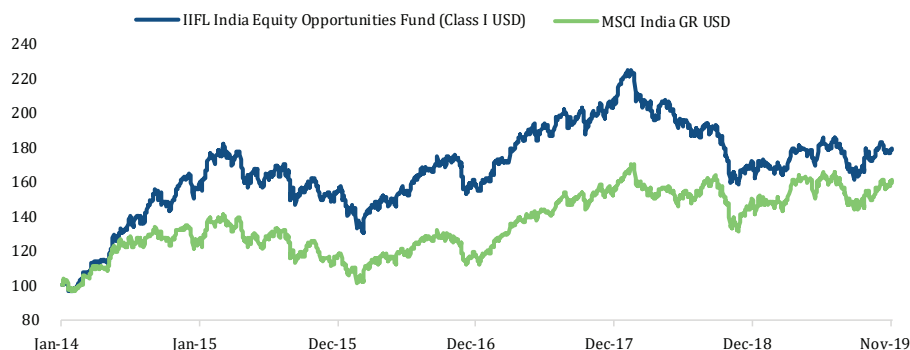

The Fund offers access to the equity market of one of the largest and the fastest-growing economies in the world. Our investment approach results in a concentrated and high conviction portfolio of stocks benefitting from the India growth opportunity. We are long term investors and focus on quality at a management, promoter and franchise level in companies offering valuations with a favourable risk-reward balance that exhibit superior compounding potential over time.

Commentary

- Mainline Indian equity indices posted lifetime closing highs with the Nifty 50 Index closing at 12,151.15 on 28th November. MSCI India closed just shy of its all-time closing high but posted a loss of 0.34% over the month in USD terms, marginally underperforming MSCI Emerging Markets which fell 0.14% over the same period. Developed markets outperformed with MSCI World Index (Developed Markets only) posting gains of 3.07% (all USD terms, total return). Whilst India and other emerging markets have performed largely in line with developed markets over the last three months, year-to-date returns still significantly lag developed markets. The INR weakened by 1.14% versus the USD.
- On 29th November the Central Statistics Office released September quarter Real GDP growth of 4.5% year-on-year. Whilst this quarterly number was in line with already weak consensus expectations, reported growth was at its weakest pace in more than six years. In response we expect further interest rate cuts from the Reserve Bank of India (next meeting on 5th December), as well as further steps from the government.
- India's second quarter fiscal year 2020 earnings season finished with moderate results, albeit marginally better than expected. Domestic demand issues impacted top line volume growth numbers, whilst the recent corporate tax cut resulted in a beat in reported net profit numbers. The banking sector led earnings gains driven by operating profit growth and improvement in asset quality, while automobiles and commodity related sectors posted the sharpest declines.

¹IIFL Fund was launched on 29 January 2019 by way of a merger with Ashburton Investments SICAV - India Equity Opportunities Fund. All performance figures prior to this date pertain to Ashburton India Equity Opportunities Fund. All returns below 1 year are absolute and above 1 year are annualized. The returns are shown for USD and GBP series in their respective currencies. Income is reinvested on the ex-dividend date. The above performance is calculated for the portfolio and actual individual investor performance will differ as a result of applicable initial fees, actual investment date, date of reinvestment and dividend withholding tax. Past performance should not be seen as an indication of future performance. Where investments involve exposure to a currency other than that in which it is denominated, any currency movement may also have an adverse effect on the capital value of your investment. Investors should carefully consider the risk factors in the Offering Documents before making any investment. Past performance is not necessarily an indication of future performance.

²Inception Date refer to the inception dates of the respective share class of the Ashburton India Equity Opportunities Fund. ³AMC Fees refers to Investment Management Fees. ⁴Total Expense Ratio (TER) is estimated and expressed as an annualized percentage of the charges, levies and fees incurred by the portfolio related to its management, for the period under review against the average NAV of the portfolio over this period. A higher TER does not necessarily imply a poor return, nor does a lower TER imply a good return. The current TER cannot be regarded as an indication of future TERs. ⁵Minimum investment amount is shown in USD and can be an equivalent amount in other respective currencies. ⁶Since inception returns for Benchmarks are from the inception date of Class I USD and GBP respectively
